A Different Approach
to Cybersecurity

Every company has unique business requirements.

Utilizing our Defendable Network approach, CyberOne listens to our customers, helps define their outcomes, and provides flexible solution sets to accomplish their goals. Through a combination of leading cybersecurity products, a dedicated professional services team, and deep industry experience, CyberOne is the choice for enterprise-level solutions to solve some of the most challenging obstacles for all market segments.

The Defendable Network approach provides a roadmap for security controls that are based on your organization's risk levels to achieve desired outcomes. Contact CyberOne to perform your own self-assessment to determine how the Defendable Network can help your organization.

CyberOne Approach

- Extensive industry experience gives your organization the expertise needed to combat the most complex security challenges.
- Expert knowledge of leading cybersecurity products means your organization will have access to the best solutions to help identify, evaluate, procure, and deploy rapidly within your organization.
- Strategic-driven solutions to your security program including remediation plans, quarterly business reviews, workshops, roadmaps, and other elements.

Reasons to Partner with CyberOne

- Expert cybersecurity Professional Services.
- Top accreditations with leading vendors.
- Best-of-breed cybersecurity solutions.
- Numerous free training courses, webinars, and events.

Determine Your SECCON Level

- CyberOne's Security Condition (SECCON) levels are our recommended controls based on YOUR level of risk acceptance and not a standard framework.
- Roadmap gains in security over time to justify product selection and budget based on defined controls.
- We design response plans to react to an incident by raising levels of controls and trust.

Security Readiness Condition

Cybersecurity Professional Services

As cyberattacks become more frequent and costly, organizations need a partner with extensive cybersecurity expertise. CyberOne's professional services team understands the unique challenges facing organizations. Our consultants represent the best of the best – individuals with real-world cybersecurity experience who hold elite global certifications. We explore your unique situation and offer customized solutions to solve your most pressing security challenges – with a laser focus on quality without the associated price tag.

Cyber Risk Advisory Services

CyberOne services include overall process governance and regulatory compliance while also ensuring strategic alignment with your regional/global security programs and business processes. Working in close partnership with your team, we design and implement effective solutions tailored to your needs including security policies, standards, controls lifecycle management, approval workflows, and security controls validation leveraging the following:

- Compliance Gap Assessment
- Privacy Gap Assessment
- Security Tools Assessment
- Data Privacy and Governance
- Artificial Intelligence Governance

Network Security

CyberOne leverages decades of combined hands-on experience with Palo Alto Networks platform. As a Certified Professional Services Partner (CPSP) for Palo Alto Networks our exclusive CYBERFORCE HEROES and GUARDIANS are the top 1% of resources globally working with Strata, Prisma, and Cortex offerings and include:

- Architecture and Design
- Deployment / Migration / Implementation
- Resident Engineer
- Tuning and Ongoing Health Checks
- Zero Trust Planning

Microsoft Security

No matter where your organization resides in its cloud migration journey, CyberOne has the expertise to help operationalize and optimize your security environment. We help train your security team so they are prepared to maintain a secure environment at all stages of the cloud migration process and beyond. We include the following as part of our cloud migration toolkit:

- Microsoft Implementation and Migration Services
- M365 Risk Assessments
- Microsoft Sentinel
- Data Loss Prevention
- Cloud Risk Assessment

Penetration Testing

Staying ahead of today's rapidly evolving cyber threats is a major challenge for any enterprise. From assessing vulnerabilities to resolving breaches once they occur, organizations need help. TeamARES' hands-on approach, including manual and automated methods, is tailored to your organization to shine a light on all potential risks and vulnerabilities before they can be exploited. Our comprehensive approach is the result of decades of collective red-teaming experience, dozens of published zero-days, and hundreds of successful customer engagements and includes:

- Red Team / Purple Team
- Penetration Testing
- Mobile Testing
- Social Engineering
- Web Application Assessments

About CyberOne

CyberOne is dedicated to offering the most effective cybersecurity solutions tailored to meet our customers' risk profile. With a focus on innovation, expertise, and engagement, we enable our customers to function securely and confidently in the ever-changing digital world.
